

WITH OVER 20 YEARS OF INDUSTRY EXPERIENCE AND ACCESS TO 300 CLINICAL TRIALS ANNUALLY, WE ARE EXPERTS AT POSITIONING RESEARCH SITES FOR GROWTH.

Make Investigator Support Services (ISS) your business development partner and build recognition in the industry as we promote your capabilities to hundreds of sponsors each year. Our automated study notification service quickly informs you of new opportunities, allowing you to choose trials that best fit your capabilities and therapeutic interests.

RETAIN YOUR INDEPENDENCE

.....

Our non-exclusive partnership encourages site autonomy and independent business development efforts. We provide you with a steady stream of clinical trials to help you supplement your research business and build new industry relationships. Sites in our network contract with and receive payments directly from sponsors and CROs.

SITE-FRIENDLY TERMS

.....

Pursue as many trials as you choose, contracting with us on a study-by-study basis with no money due unless you are paid by the sponsor. Fees are structured to meet the unique financial needs of each research site and factor in budget shortfalls.

PROMOTE YOUR SITE

.....

We introduce you to site selection decision makers and exhaustively promote the ISS network to over 50,000 individuals in the industry by:

Scouring press releases and subscription services to ensure timely and aggressive pursuit of trials

Networking with new contacts and maximizing our longstanding relationships to secure in-demand trial opportunities

Attending and exhibiting at conferences to build a strong presence in the medical and clinical research communities

Marketing through advertisements, directory listings and frequent email campaigns to increase credibility and public awareness
